DOKUMENTASI KEGIATAN

DMC
DINAMIKA MEGATAMA CITRA

KESIMPULAN dan SARAN

KESIMPULAN

1. Pada penelitian **Peningkatan nilai karkas** di farm Genengan, perlakuan pakan **Trial B lebih baik** dibandingkan pakan Kontrol dan pakan Trial C. Hal ini terlihat dari peforma IP pada masing-masing perlakuan pakan.
2. Pada perhitungan **Feed Cost**, pakan **Kontrol paling tinggi** dibandingkan pakan Trial B dan Trial C.
3. Pada perhitungan **Total Income** pakan **Trial C lebih tinggi** dibandingkan dengan pakan Kontrol dan Trial B, hal ini dikarenakan secara rata-rata Body Weight hasil panen pakan trial C lebih tinggi dibandingkan perlakuan pakan lainnya sehingga berpengaruh terhadap pencapaian tonase panen.
4. Pada **perhitungan IOFC** pakan perlakuan **Trial C lebih menguntungkan**, disusul pakan Trial B dan terakhir pakan Kontrol.

SARAN

1. Perlu dilakukan **Validasi ulang / penelitian kembali** untuk memastikan hasil penelitian sebelumnya.
2. Secara Peforma pakan **Trial B lebih bagus** dibandingkan perlakuan pakan lainnya, namun karena secara Formula **Cost lebih mahal** dibandingkan perlakuan pakan lainnya hal ini berdampak terhadap IOFC yang diterima.
